Dear Bill,

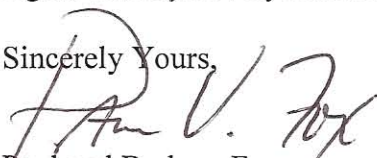

I want to thank and compliment you on the remodel and expansion of the shower in the master bath in our home. I have never had remodel work done with as much care and interest in preserving the condition of the home while the work was proceeding.

Your people were professional at all times. When they left the house each day the working area was vacuumed and cleaned and the construction materials were neatly put aside so there would be hardly any disruption in our lifestyle while the shower was rebuilt. The work proceeded without interruption and was finished in a timely manner. The finished product turned out looking better than we had pictured it from the beginning.

If anyone has a question about your work feel free to have them call us or stop by the house and we will show them what a real professional company can do in this day and time where most people only want your money for shoddy work. I have already recommended you to my neighbors that were wondering what was going on.

Again thank you very much for taking care of our home.

Sincerely Yours,

Paul and Barbara Fox
